PROJECT REPORT

Of

GAJAK MANUFACTURING UNIT

PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Gajak Manufacturing Unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.

[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

<u>Lucknow Office</u>: Sidhivinayak Building , 27/1/B, Gokhlley Marg, Lucknow-226001

Delhi Office : Multi Disciplinary Training Centre, Gandhi Darshan Rajghat, New Delhi 110002

1. INTRODUCTION

Jaggery and confectionery are the classical decentralized cane sweets prepared and used by many people all over the world. Both are playing an overriding role in the sugar economy by reaching the demands of export trade. Traditionally, India has been producing jaggery and confectionery for export revenues and is the foremost leading countries in exporting jaggery and confectionery since the ancient period. The current stage of jaggery exports is not consistent with high variance in prices due to changing market scenario, income and taste patterns. India with divergent food habits is having a number of traditional foods, including sweet products. Brittle Gajak is one of the popular Indian traditional sweet snacks. Brittle Gajak is mainly prepared using jaggery as a sweetener and roasted nuts/sesame. Mostly liked by all age groups, also possesses nutritional importance in it.

2. MARKET POTENTIAL:

Gazak, also called as peanut brittle in western countries is a ready to eat traditional sweet snack, which is popular throughout the country and consumed by all the sections of the population. The functional food industry in India is strong and is a growing force in the international health foods market. The health and wellness foods market is currently estimated to be in the vicinity of USD 1.6 billion and was of USD 7.5–10 billion by the year 2015. According to market statistics, the global functional food and nutraceuticals market is increasing with a compound annual growth rate (CAGR) of 7.4% that is outpacing the traditional processed food market and is expected to reach USD 180 billion in 2018.

In the world, India ranks first in the production and area of sesame seeds and is grown in different seasons covering practically all agro-ecological zones. Sesame is a rich source of calcium (approx. 1%) and phosphorous (approx. 0.7%). Sesame contains ample amounts of oleic (43%), linoleic (35%), palmitic (11%) and stearic acid (7%) which together comprise 96% of the total fatty acids (saydut A et al., 2008) It has many uses and it is markedly different from other vegetable oils due to its high nutritional and therapeutic values.

Gur (Jaggery) is a natural, traditional sweetener made by the concentration of sugarcane juice and is known all over the world in different local names. India is the largest producer and consumer of jaggery. Out of total world production, more than 70% is produced in India.

3. PRODUCT DESCRIPTION

3.1 PRODUCT BENEFITS

The demand for functional ingredients in Gajak is rising, owing to their nutritional benefits.

- Boosts Digestion: Sesame seeds and jaggery are both great for digestion and ensure regular bowel movements.
- Boosts Skin Health: Sesame seeds have anti-inflammatory properties that are good for the skin, which tends to become dry and flaky during winters.
- Boosts Energy Levels: The presence of jaggery in gajak makes it a great energiser. Even sesame seeds are great for boosting energy levels, due to the presence of high levels of good fat in them. Eating a small piece before or after your workout may boost energy or fasten recovery, respectively.
- Satiating Fiber: Gajak is filling, as sesame seeds are rich in fiber, which makes it a good winter snack

3.2 RAW MATERIAL

The raw materials required for Gajak is as follow:

- ➤ Sesame
- ➤ Jaggery
- ➤ Water

Average raw material cost per 1 kg packet of Gajak: Rs. 50-60

3.3 MANUFACTURING PROCESS

- First step is to roast the sesame in the roasting machine to withdraw the rawness in the seeds and kept aside to cool down.
- Side by side jaggery and water is melted together to make a sugary syrup which later after cooling is kneading to look like a loosened dough.
- Next step involves the mixing of sesame and the jaggery syrup together and are properly mashed and mixed such that the sesame seeds break into coarse material mixed in the melted jaggery.
- The mixture is then put into the machine for further cooling, shaping and cutting into bars.
- The final stage is the packaging stage, where the finished confectionery is packaged by using packaging machine or it can also be done manually

4. <u>PROJECT COMPONENTS</u>

4.1 Land & Building

The approximate total area required for complete factory setup is 2000-2500 Sq. ft. for smooth production including storage area. It is expected that the premises will be on rental.

4.2 Plant & Machinery

| Machine Name | Description | Machine Image. |
|--------------------------------|---|----------------|
| Jaggery syrup making kettle | These kettles have the limpet elaborate heating surface which helps in making the syrup quickly without charring and burning. | |
| Sesame Roasting Machine | Used in roasting sesame. This machine can also roast all types of edible seeds. | |

| Sesame Bar making machine | This compact machine includes: ✓ Gajak mix rolling and feeding system ✓ Gajak mix cooling system ✓ Gajak bar cutting/slicing machine | |
|---|---|--|
| RO Water Plant | It is a water purification process that uses a partially permeable membrane to separate ions, unwanted molecules and larger particles from drinking water. | |
| Material handling Equipments & other equipments | These Equipments are used for material handling | |

Note: Approx. Total Machinery cost shall be Rs 14.10 lakhs including equipment's but excluding GST and Transportation Cost.

4.3 **Power Requirement**

The borrower shall require power load of 10 KW which shall be applied with Power Corporation.

4.4 Manpower Requirement

18 Manpower are required for the Maize Flour Mill Business.

Includes:

- 3 Plant Operator
- 1 Supervisor
- 4 Skilled Labour
- 4 Unskilled Labour
- 1 Manager
- 4 Administrative Staffs
- 1 Accountant
