## PROJECT REPORT

## Of

## LEATHER CRICKET BALL

## PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Leather Cricket Ball Manufacturing unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

## LEATHER CRICKET BALL MANUFACTURING

## UNIT

## Introduction:

Cricket is the most popular game in our country but it is also played all over the world; cricket is mainly played in commonwealth countries. After partition of the country in 1947, large number of workers migrated to India. They have subsequently settled down in Meerut (U.P.) and Jalandhar (Punjab), where they started manufacturing cricket balls. India is the leading manufacturer of Cricket balls and have been in practise in England for centuries. But the undue increase in labour cost and rising demand for the product, the balls prices got unreasonable in Great Britain and the centre of ball manufacturing shifted to India. As per survey conducted in 2014, over 90 percent of leather cricket balls are made in India. Meerut and Ludhiana contribute maximum to the above percentage, as maximum number of leather cricket ball manufacturing units are based in these two cities of India.

## Uses \& Market Potential:

Cricket balls are traditionally red, and red balls are used in Test cricket and Firstclass cricket but proposals to introduce other colours date back at least as early as 1937. Red balls are more durable than white balls. Due to this reason, the red cricket balls can be used for 80 overs or more. The production is about 180 thousand dozens per year valued more than Rupees 300 lakhs. The demand for quality goods is increasing hence there is a scope for another 10 to 15 new units every year. The important raw materials required for the manufacturing of cricket balls is leather, thread, cork, polishes and wool. Fortunately, all the items mentioned above except cork are indigenously available. Cork will have to be imported.

## Product:

Leather Cricket Ball

## Raw Material:

The raw materials are mentioned below:

- Cork-rubber
- Leather
- Packing Material

## Manufacturing Process:

The steps are:
$\checkmark$ Raw material procurement
$\checkmark$ Leather seasoning and cutting of leather to length
$\checkmark$ Stitching of Leather Piece
$\checkmark$ Assembly of leather pieces and cork ball
$\checkmark$ Final stitching step

## Area:

The industrial setup requires space for Inventory, workshop or manufacturing area, space for power supply utilities and polishing area. Also, some of the area of building is required for office staff facilities, office furniture, etc. Thus, the approximate total area required for complete industrial setup is $1500-2000$ Sqft.

## Cost of Machines:

| Machine | Quantity | Rate | Amount |
| :--- | :--- | :--- | :--- |
| Power Operated Press <br> Machine | 1 | 225000 | 225000 |
| Core seasoning oven | 1 | 500000 | 500000 |
| Hydraulic Stamping Press <br> Machine | 1 | 300000 | 300000 |
| Leather Buff Polishing <br> Machine | 1 | 60000 | 60000 |
| Sewing Machine | 1 | 35000 | 35000 |
| Other Equipment's and tools | - | - | 50000 |
| Total Amount |  |  | $\mathbf{1 1 7 0 0 0 0}$ |

Power Requirement- The estimated Power requirement is taken at 20 HP .

Manpower Requirement-Following manpower is required:

- Machine operator-2
- Skilled/unskilled worker-3
- Helper-4
- Manager cum Accountant-1
- Sales Personnel-2

## Assumptions:

1. Production Capacity of Leather Cricket Ball Manufacturing unit is taken at 200 Balls per day. First year, Capacity has been taken @ 30\%.
2. Working shift of 10 hours per day has been considered.
3. Raw Material stock and Finished goods closing stock has been taken for 10 days.
4. Credit period to Sundry Debtors has been given for 12 days.
5. Credit period by the Sundry Creditors has been provided for 15 days.
6. Depreciation and Income tax has been taken as per the Income tax Act,1961.
7. Interest on working Capital Loan and Term loan has been taken at $11 \%$.
8. Salary and wages rates are taken as per the Current Market Scenario.
9. Power Consumption has been taken at 20 HP.
10. Selling Prices \& Raw material costing has been increased by 3\% \& 2\% respectively in the subsequent years.
