## PROJECT REPORT

## Of

## SOCKS MANUFACTURING UNIT

## PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Socks Manufacturing Unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

## SOCKS MANUFACTURING UNIT

## Introduction

A sock is an item of clothing worn on the feet and often covering the ankle or some part of the calf. Some type of shoe or boot is typically worn over socks. In ancient times, socks were made from leather or matted animal hair. In the late 16th century, machine-knit socks were first produced. Until 1800 both hand knitting and machine knitting were used to produce socks, but after 1800, machine knitting became the predominant method.
One of the roles of socks is absorbing perspiration. The foot is among the heaviest producers of sweat in the body, as it can produce over 0.25 US pints of perspiration per day, socks help to absorb this sweat and draw it to areas where air can evaporate the perspiration. In cold environments, socks made from wool insulate the foot and decrease the risk of frostbite. Socks are worn with sport shoes (typically white-coloured socks) and dress shoes (typically dark-coloured socks). In addition to the numerous practical roles played by socks, they are also a fashion item, and they are available in myriad colours and patterns.

## Description of Sock Machine

Machinery for Sock includes the following:

- Polyester Blender
- Polyester Texturiser
- LYCRA Yarm
- DOP Dyed

Sock Machines are used to manufacture sock from different types of raw material. With the help of this machine the work of rolling, Cutting, stitching \& packaging completes in a very short span.

## Socks Market Analysis

The global socks market size was valued at USD 42.2 billion in 2018. Rising importance of maintaining formal attire among white-collar professionals on a global level is expected to play a crucial role in expanding the utility of socks. This, in turn, is expected to boost the market growth in the coming years.

## Socks Manufacturing Process

- Put the roll of polypropylene on the roller.
- Put the input into the machine.
- Start the machine.
- After that machine will automatically complete the further processing of manufacturing.
- Packaging of goods.

## Machinery \&Equipment's required:

| Name | Cost |
| :--- | :---: |
| Total Value of Machinery | 650000 |
| GST @18\% | 117000 |
| Total | $7,67,000$ |

Cost of the machine is exclusive of other transportation cost.

## Land \&Building required:

Land required 1200 Square Feet (approx.)
Approximate rent for the same is 24000 .

## Labour Requirement:

2 Manpower is required for the Sock Manufacturing unit.
Includes:
1 skilled Labour
2 Unskilled Labour

## Raw Material Requirement of Socks

* Polypropylene
* Blended yarn
* Cotton

Average raw material cost per KG: Rs. 140

## Sock License \&registration

## For Proprietor:

- Obtain the GST registration.
- Obtain the license from cosmetic \& Drug Control Department.
- Fire/ Pollution Registration as required.
- Choice of a Brand Name of the product and secure the name with Trademark if required.

## Implementation Schedule

| S.N. | Activity | Time Required <br> (in Months) |
| :---: | :--- | :---: |
| 1 | Acquisition Of premises | 1 |
| 2 | Construction (if Applicable) | $1-2$ Months |
| 3 | Procurement \& installation of Plant \& Machinery | 1 |
| 4 | Arrangement of Finance | 1 |
| 5 | Requirement of required Manpower | 1 |
|  | Total time Required (some activities shall run <br> concurrently) | $2-3$ Months |
