

# His small efforts made him big entrepreneur

Shri Narayan Sutradhar has been engaged in traditional carpentry works. He knew that setting up of a semi-mechanized carpentry unit could improve his earnings. But, his financial position was not good enough to set up a carpentry unit. He took a bank loan for the project cost of Rs. 2.50 lakh under PMEGP and set up a semi-mechanized carpentry unit. The progress of the unit, in the first year of its operation was quite encouraging. Presently, three workers are working. The annual turnover of the unit has reached to Rs.7.50 lakh by providing employment to 4 persons.

He is optimistic that in future he can create employment opportunities for more workers. He has a plan to avail a cash credit loan from the bank.
