

# Concrete Success

An Engineering degree holder Shri Prakash Kolar established P.M.K. concrete Products, a Production house of cement hollow brick items after availing bank loan for the project cost of Rs.10.00 lakh under the PMEGP scheme from State Bank of India. He came to know about PMEGP Scheme through a local news paper.

His Production is cost effective, produced with advanced technology and Premium components. This product range meets the diverse requirements of clients in construction industry and can thus be customized as per client's specification. Technical knowledge of the construction industry has helped him in bringing out quality production based on the need of the customers.

The trade has grown three folds with in a short span due to his hard work and uncompromising quality. The turnover of P.M.K. concrete products has reached to Rs. 35.00 Lakh per annum. The unit also provided employment to 12 unemployed youth.
