

# Acceptable Plastic Bag

While various NGOs and green activists have been crying loud about the harmful effect of plastic bags and calling for its complete ban, Shri Sathish claims that plastic bags above 20 micron is not hazardous.

After working for two years on wage employment in the same field, Shri Sathish came to know about PMEGP scheme of KVIC through DIC. By availing a bank loan for the project cost of Rs. 14.00 lakh from Indian Bank, Melipakkam Branch, he started his unit Yes Flexo graphic polythene bags. His unit generated employment to 13 persons, with an annual turnover of Rs. 50.00 lakh.

"People have a misconception that food parceled in plastic bags causes cancer and other diseases. This is a wrong assumption. Plastic bags are manufactured by using polythene, which is approved by 'Food & Drugs
